

WORKFORGE

Leadership Pathway

Effective leadership means to motivate someone or a group to act towards achieving a common goal. Employees that have a positive relationship with their supervisor or manager enjoy their job more and typically stay with the organization longer.

PROBLEM:

Increased turnover results in the productive line operators being elevated to supervisory roles without proper skills development on how to lead and manage a team. This lack of leadership skills results in continued job dissatisfaction within the team and continued employee turnover issues.

SOLUTION:

WorkForge offers a configurable, three-pronged Supervisory and Leadership skills development program to improve your team's operational leadership skills and help you recognize and grow your company's employees of today into leaders of tomorrow.

- 1 ONLINE**
Enroll your leaders into our online leadership skills development courses to learn foundational skills and prepare for the in-person session.
- 2 IN-PERSON**
Our seasoned and highly skilled leadership coaches will execute in-person sessions done inside your facility. Working with your leadership team, we create a custom curriculum track and scheduled quarterly or bi-annual series of in-person sessions.
- 3 FOLLOW UP**
Between in-person sessions, our leadership coaches will schedule a series of one-hour follow up coaching sessions with your leaders to reinforce their development through their on-the-job experiences.
