

WORKFORGE

Strengthening American Manufacturing

What We're About

WorkForge is on a mission to strengthen American manufacturing and our communities by providing engaging and effective workforce skills development solutions. We focus on streamlining employee onboarding and development, increasing engagement, improving employee time-to-productivity and enhancing employee retention.

WorkForge designs, implements, and hosts engaging eLearning solutions for manufacturers focused on solving the skills gaps that come with training a modern-day workforce and collecting the data needed to drive operational excellence on the production floor.

By The Numbers

62.5%

Improved onboarding and orientation time

Proven solutions that will improve your employee's time-to-productivity.

250,000+

Learners led to skills mastery with Workforce

A better-trained workforce leads to a stronger supply chain, stronger economy, and safer workplace.

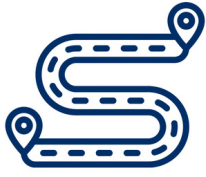

25%

Increase in employee retention

Engaging content increases job satisfaction, leading to increased productivity and reduced turnover.

Career Pathways

By integrating job specific content focused on technical skills, regulatory and compliance requirements, quality and continuous improvement essentials, durable skills, and leadership skills, WorkForge has organized content into guided pathways to quickly move employees from entry to advanced levels in less time.

Visual Work Instruction

Using an organization's people, processes, and equipment, WorkForge creates modules for your specific job, task, or machine. This solution ensures the retention of institutional knowledge of the exact operation.

Technology & Enablement

Our user and mobile friendly platform offer a centralized location where learners engage with their assigned content. This intuitive solution also identifies training gaps on your team through robust data analytics while analyzing opportunities to better operate each day. (SOC2 & FEDRAMP Compliant)

Supervisory & Leadership

Using an organization's people, processes, and equipment, WorkForge creates modules for your specific job, task, or machine. This solution ensures the retention of institutional knowledge of the exact operation.
